Cambodia – the gift of literacy and the Bible

The gift of literacy and the Bible in a country recovering from decades of war.

- Cambodia is still recovering from years of war, which left not only millions of people dead or injured, but a country devoid of infrastructure. Many Cambodians today are unable to go to school because of poverty or isolation.
- It is estimated that **1 in 4 Cambodians cannot read or write**. Bible Society is committed to serving the people of Cambodia through our biblical literacy programme. Literacy classes enable Cambodians to improve their reading skills and to interact with the Word of God.
- Bible Society is **partnering with local churches** to establish 330 new Level 1 classes to run for three months, followed by 300 Level 2 classes in the second half of 2015. Many of these classes will operate in towns which do not currently house a government school. The classes use a **Scripture-based textbook with an evangelistic message**, and students are given Scripture portions upon completion of their training.
- We're praying that 6,000 students will be able to join the literacy classes this year.
